- *Is quite apparent that your clinic is using cutting edge technology*

See why MedaView® Software is the most sought-after software for *MedX* lumbar and cervical extension machines. Call today to arrange a free personalized online demonstration. Call MedaView at 888-282-0554.

Clinic Owners: Rest easy knowing your medical rehab department will be fully functional with no interruptions of the revenue stream generated from the back and neck extension machines. The old DOS interface many clinics are using on their back and neck extension machines is obsolete and will not function on modern computers.

Clinic Therapists: Perform your tasks with utmost confidence using the latest technology as you practice your skills as a rehabilitation specialist. And, MedaView Software will save you time!

Doctors: Achieve the results you intend from your prescribed treatment plan using MedaView's unique Pacer to deliver standardized workouts each and every patient visit.

Patients: MedaView Software will change the way your patients view your practice. They'll see that you're using cutting edge technology to give them the best workout possible. Just seeing that you're using the most up-to-date software available will give your patients a sense of security. They'll truly believe the workout you give them is the best strength training session they can get.

Using the latest computer technology coupled with the reliability and ease of the MedaView Software and medical machine interface, the therapist, doctor, and patients will benefit from this combination of computer, software, and machine.

MedaView Software allows the clinic to take advantage of Microsoft's operating system features including graphics, fonts, and fast database acquisition. You can also now take advantage of the latest computer processing capabilities and speed, and high-speed printer capabilities. With our computer packages you get a redundant hard drive mirroring system, the ability to use high resolution LCD monitors, and impressive graphics and fonts.
